

November S.M.A.R.T. Tip

Scanning Game!

Scanning develops eye movement skills, which improves vision and reading skills.

How Kids Can Scan At Home:

- Use a newspaper, magazine, or print off songs and/or nursery rhymes.
- At the start of a paragraph, have your child draw a line under the text and scan to find a word or letter, circle it and repeat.
- For example, have them circle every "i" in "Twinkle, Twinkle Little Star."
